

BACHELOR OF SCIENCE IN SUPPLY CHAIN MANAGEMENT

A successful supply chain management career requires an understanding of the major elements of supply chain management processes and technologies. The Bachelor of Science degree in Supply Chain Management (BSSCM) program provides a practical and theoretical foundation within the field in accordance with the university's Christian heritage and mission. The BSSCM program will provide a systematic analysis of the core components of supply chain operations across varying types of industries and will include the study of financial controls, inventory control, warehousing, transportation, and handling. Students apply theories and practical skills of supply chain management including quality improvement and inventory management for the global supply chain. Careers in the field of supply chain management include the areas of logistics, operations research, business and financial operations, buying and purchasing, and cost estimation. Students will also be equipped to continue their studies in graduate programs in supply chain management or related fields.

Program Learning Outcomes (PLO) for the B.S. Degree in Supply Chain Management
